

Daniel V. Esposito

500 W. 120th St., Mudd 801, New York, NY 10027

Website: <https://solarfuelsengineering.com/>

de2300@columbia.edu

EDUCATION

- Postdoctoral Fellowship** 2012-2014
National Institute of Standards and Technology, Gaithersburg, MD
National Research Council (NRC) Fellowship Program
- Ph.D., Chemical Engineering** Jan. 2012
University of Delaware, Newark DE
Solar Hydrogen NSF IGERT Program
- B.S., Chemical Engineering** May 2006
Lehigh University, Bethlehem PA
Graduated Tau Beta Pi, and with institutional honors

PROFESSIONAL EXPERIENCE

- Associate Professor** 2019-present
Department of Chemical Engineering, Columbia University, New York, NY
- Advisor** July-Dec. 2022
sHYp, BV PBC, Wilmington, DE
- Assistant Professor** 2014-2018
Department of Chemical Engineering, Columbia University, New York, NY

RESEARCH INTERESTS

- **Electrocatalytic and photocatalytic materials**
 - Electrocatalysts and photocatalysts for conversion of H₂O and CO₂ to energy dense fuels.
 - Electrocatalysis and photocatalysis at buried interfaces
 - Electrocatalyst design, synthesis, and characterization
 - Electroanalytical techniques to study interfacial charge transfer phenomena
- **Electrolyzers and photoelectrochemical devices**
 - Membraneless electrochemical and photoelectrochemical cells
 - Photovoltaic (PV)-electrolysis reactors
 - Polymer electrolyte membrane (PEM) and alkaline electrolyzers
 - Fuel cells
 - Understanding and controlling bubble dynamics in (photo)electrochemical reactors
- ***in-situ* imaging of PEC, PV, and catalytic materials and devices**
 - Scanning electrochemical microscopy (SECM)
 - Non-local scanning probes for high areal scan rates and high throughput screening of materials
 - Scanning photocurrent microscopy (SPCM)
 - High speed video analysis of operating electrochemical cells
 - Spectroelectrochemistry

PUBLICATIONS

Peer Reviewed Articles (since start of DVE's independent research career in 2014)

Note: articles are listed in reverse chronological order, with (*) indicating corresponding author.

Note: many of our research articles involve the use of custom test cells or devices. Design files (.stl) for any/all cells used as a part of published research are made freely available for download at: http://echem.io/AM_design_files

Patents: 4 patents issued, 7 provisional patents filed

1. **D.V. Esposito**, “Electrolysis Cell Systems Including Proton Conducting Oxide Membranes”. (U.S. Patent Application No.: US2023 63/453,671)
2. **D.V. Esposito**, X. Pang, “Systems and Methods for Electrochemical CO₂ Conversion in Membraneless Electrolyzers”. (US Provisional patent Application US202363429665)
3. **D.V. Esposito**, L.F. Greenlee, “Systems and Methods for Electrochemical Generation of Acid and Base”. (US Provisional patent Application No. 63/439677, filed Jan. 2023).
4. S. Ardo, Z. Chen, **D.V. Esposito**, R. Bala Chandran, Z. Chen, J. M. Mayer, B. James, J. Huya-Kouadio, “Designs for Photocatalyst Suspension Reactors for Solar Fuel Formation”, (US Provisional patent Application No. 63/349442, filed June 2022).
5. X. Li, Av. Harutyunyan, X. Liu, B. Li, J. Hone, **D.V. Esposito**, “Catalyst Compositions Including Metal Chalcogenides, Processes for Forming the Catalyst Compositions, and Uses Thereof”, US. Patent No. 11,565,247 (IR# CU21120). Download [here](#).
6. **D.V. Esposito**, Q. van Hinsberg, “Membraneless Electrolyzers for the Production of Alkaline and Acidic Effluent Streams”, WO 2022/104242 A1. International Publication Date 19 May 2022.
7. S. Kawashima, **D.V. Esposito**, S. Ma, A.H. Akca, “METHODS AND SYSTEMS FOR PROVIDING IMPROVED CEMENT INCORPORATING METAL OXIDES AND HYDROXIDES”. (US. Patent Publication No. [20210188711](#)).
8. **D.V. Esposito**, X. Pang, S. Kawashima, “Systems and Methods for Membrane-Free Electrolysis”. (Patent application: [PCT/US2020024699](#))
9. **D.V. Esposito**, J. Wright, G.D. O’Neil, H. Kuo, “Continuous Multi-Dimensional Scanning Probes (CMDPs) for Scanning Probe Microscopy” (Patent Application # 62/661,823 filed with USPTO)
10. **D.V. Esposito**, G.D. O’Neil, “Membraneless Electrochemical Flow-Through Reactor”. US Patent No. 2017/0081770 A1, 2017.
11. **D.V. Esposito**, A.A. Talin, and T.P. Moffat, “Photoactive article, process for making, and use of same”. US Patent No. 9,562,292, 2017.

INVITED TALKS (Since joining Columbia; list excludes internal talks)

1. ACerS MCARE conference, Symposium 5, Bellevue WA, August 2023.
2. ACerS MCARE conference, Symposium 3, Bellevue WA, August 2023.
3. Princeton University, Student ECS chapter seminar, Princeton, NJ, June 2023.
4. ECS Annual Spring Meeting, Boston MA, May 2023.
5. Georgia Tech, Chemical Engineering Dept., March 2023.
6. ECS Annual Fall Meeting, Symposium I04, Atlanta GA, October 2022.
7. ECS Annual Fall Meeting, Symposium F02, Atlanta GA, October 2022.
8. Columbia University – Tel Aviv University Engineering Research Symposium (Virtual), Oct. 2021.
9. ECS Annual Spring Meeting (Virtual), April 2021.
10. MRS Annual Spring Meeting (Virtual), April 2021.
11. Cornell University, Materials Science & Engineering Dept., March 2021.
12. Colorado School of Mines, Materials Science & Engineering Dept., February 2021.
13. University of Cantabria (Spain), Chemical Engineering Dept. November 2020.
14. Rutgers University, Materials Science & Engineering Dept., October 2020.
15. Lancaster University (UK) / Energy Lancaster, Virtual seminar, July 2020.

16. Global Virtual Meeting on Solar Fuels, organized through MaterialsOceania, June 2020.
17. Lablinks Carbon Capture and Conversion Workshop, Harvard, MA, October 2019.
18. Korea Advanced Institute of Technology (KAIST), Materials Science Dept., Sept. 2019.
19. Korea Institute of Technology (KIST), Clean Energy Research Center, Sept. 2019.
20. 7th International Workshop on Nanotechnology, Renewable Energy & Sustainability, Xi'an Jiaotong University, China, September 2019.
21. ACS national meeting, San Diego CA, August 2019.
22. E-MRS meeting in Nice, France, May 2019
23. Warwick University (UK), Chemistry department, May 2019.
24. MRS national meeting, Boston MA, November 2018.
25. Electricity-to-X workshop, Denver CO, Sept. 2018.
26. ACS Fall Meeting, Boston MA, Aug. 2018.
27. ECS Spring Meeting, Seattle WA, May 2018.
28. Technical University in Delft (TUD), Chemical Engineering Dept. seminar, May 2018.
29. KU Leuven (Belgium), Department of Microbial and Molecular Systems, May 2018.
30. Leiden University (Netherlands), Chemistry Dept., May 2018.
31. City College of New York (CCNY), Chemical Engineering Dept. seminar, Feb. 2018.
32. New Jersey Institute of Technology, Chemical Engineering Dept. seminar, Oct. 2017.
33. NanoGe Meeting, Solar Fuels Symposium, Barcelona, Spain, September 2017.
34. New York Catalysis Society Symposium, Clinton, NJ, March 2017.
35. University of Delaware, Center for Catalytic Science and Technology, March 2017.
36. University of Missouri, Chemical Engineering Department seminar, March 2017.
37. International Conference on Catalysis and Chemical Engineering, Baltimore, MD, February 2017.
38. Closing the Carbon Cycle Conference, Arizona State University, AZ, October 2016.
39. ACS MARM conference, Riverdale, NY, June 2016.
40. Workshop on Photovoltaic Electrolysis, University of Delaware, March 2016.
41. St. John's University, Chemistry Department, February 2016.
42. City University of New York (CUNY) Queens, Chemistry Department, December 2015.
43. ECS Fall Meeting, Phoenix AZ, October 2015.
44. SPIE Optics and Photonics Conference, San Diego CA, August 2015.
45. ECS Spring Meeting, Chicago, IL, May 2015.
46. ACS Spring Meeting, Denver, CO, March 2015.
47. Rochester Institute of Technology (RIT), School of Chemistry and Materials Science, March 2015, Rochester NY.
48. Gordon Research Conference on Electrodeposition, Biddeford ME, July 2014.

TEACHING AND MENTORING

Courses taught

- CHEN E4140, Engineering Separations (2023-present)
- CHEN E4330, Advanced Chemical Kinetics (2014-2020, 2023)
- CHEN E3810, Chemical Engineering Laboratory (2021)
- CHEN E4231, Solar Fuels (2016-2021, 2024-present)
- CHEN E9000, Chemical Engineering Colloquium (2015-2017)
- CHEN E9500, Doctoral Research (2015-present)

- CHEN E9400, Masters Research (2014-present)
- CHEN E3900, Undergraduate Research (2014-present)

Experience as a mentor for PhD, postdoc, MS, and undergraduate student research

- **Doctoral students (sponsored):** (6 Ph.D. students graduated to date)

1. Natalie Labrador
Thesis: “*Oxide-Encapsulated Electrocatalysts for Solar Fuels Production*”
2. Jonathan “Jack” Davis
Thesis: “*Membraneless Electrolyzers for Solar Fuels Production*”
3. Anna Dorfi
Thesis: “*In-situ Scanning Probe Techniques for Evaluation of Electrochemical Systems*”
4. Marissa Beatty
Thesis: “*Design Rules for Membrane Coated Electrocatalysts*”
5. Xueqi Pang
Thesis: “*Design Principles for Membraneless Electrolyzers for Production of Fuels and Chemicals*”
6. Daniela Fraga Alvarez
Thesis: “*Bursting the Bubble: Membraneless Electrolyzers and High-Surface Oxide Coated Electrodes for Brine Management*”
7. William Stinson (current student)
8. Daniela Bushiri (current student)
9. Lucas Cohen (current student)
10. Patrick Aghadiuno (current student)
11. Jingjing Jin (current student)
12. Kevin Dunn (current student)

- **Doctoral students (reader and committee member):** 42

- **Postdoctoral researchers and associate research scientists:**

1. Glen O’Neil (faculty member at Montclair State U.)
2. Xiangye Liu (faculty member at Northwestern Polytechnic University, Xi’an)
3. Amanda Baxter
4. Kyungmin Yim
5. Zhexi Lin (postdoc: 2023, associate research scientist: 2024-present)
6. Jesse Dondapati

- **MS researchers:** 40

- **Undergraduate researchers:** 22

- **Highschool researchers:** 8

AWARDS & HONORS

- 2020- Selected as one of 30 experts on solar fuels technology in the US and Germany to participate in recurring workshops on “Artificial Photosynthesis” organized jointly by the US DOE (BES) and German Federal Ministry of Education and Research (BMBF).
- 2018-NSF CAREER Award (CBET Catalysis program). See Columbia [press release](#).
- 2017-2018 [Scialog Fellow](#). Participated in multi-year interdisciplinary initiative on “Advanced Energy Storage” with peer fellows and senior facilitators recognized to be leaders in the field of electrochemical energy storage.
- 2018 Invited contributor to the *J. Materials Chemistry A*. Emerging Investigators Issue.
- 2017 Invited contributor to the *Chemical Communications* Emerging Investigators Issue.

- [NRC Postdoctoral Fellowship](#), National Institute of Standards and Technology National Research Council Postdoctoral Research Associateship Program-2011
- Fellowship, U. Delaware, [Bill N. Baron Fellowship Award](#)-2010
- Fellowship, U. Delaware, [NASA Delaware Space Grant College and Fellowship Program](#)-2008
- Fellowship, U. of Delaware, [Solar Hydrogen IGERT Program](#)-2006
- ACS Award for outstanding senior in Chemical Engineering at Lehigh University-2006
- Chandler Award for excellence in Chemical Engineering, Lehigh University – 2004

PROFESSIONAL AFFILIATIONS

American Institute of Chemical Engineers, Electrochemical Society, International Society of Electrochemistry, American Chemical Society (CATL division member), Materials Research Society, Tau Beta Pi Engineering Honor Society

PROFESSIONAL SERVICE

- **Proposal reviewer:** Served as a reviewer of grant proposals for the following funding agencies: DOE/EERE (4 times), NSF (9 times), NASA(1), AFOSR(1).
- **Peer reviewer, journals** (10-20 articles /year): Nature, Angewandte Chemie, Energy & Environmental Science, Joule, Nature Materials, PNAS, Nature Communications, PNAS, ACS Catalysis, J. American Chemical Society, Nature Catalysis, J. Physical Chemistry, J. Electrochemical Society, Electrochimica Acta, ACS Nano, Advanced Energy Materials, ChemPhysChem, J. Catalysis, Sustainable Energy & Fuels, Int. J. Hydrogen Energy, Applied Catalysis B, J. Power Sources, Rev. of Scientific Instruments, Scientific Reports, ACS Applied Materials & Interfaces, and more.
- Co-Editor of book published through the Royal Society of Chemistry’s Energy and Environment Book Series, titled [Ultrathin Oxide Layers for Solar Fuels and Electrocatalytic Systems](#) (co-edited with Heinz Frei at Lawrence Berkeley National Lab). Published in 2023.
- Steering Committee Member for DOE- and German Ministry of Education and Research (BMBF)-sponsored initiative to help coordinate workshops, panel discussions, and webinars on diverse topics relating to renewable fuels production. (2021-2022)
- Participant in 3-day U.S.-German Workshop on “Artificial Photosynthesis” organized jointly by the US DOE (BES) and German Federal Ministry of Education and Research (BMBF). Workshop was attended by \approx 30 top researchers in the US and Germany active in solar fuels research. (Originally scheduled to be in Berlin, Germany but switched to virtual meeting, June 2020)
- Participant in DOE BES roundtable workshop on liquid solar fuels that was tasked with identifying priority research opportunities for the solar fuels field. Contributed 3-page write-up to pre-workshop factual document and contributed written sections to the final workshop report. (Rockville MD, August 2019)
- Reviewed standard operating procedure (SOP) documents associated with best-practice testing procedures for photoelectrochemical cells and low-temperature electrolyzers as a part of the DOE HydroGEN Benchmarking EMN2B Program. (2019)
- Guest editor for special issue on 3D printing in ECS Interface Magazine. (2015-2016)
- **Conference & workshop organization:**
 - Lead organizer of 2022 Wilhelm Symposium in honor of Jinguang Chen at annual AIChE meeting.
 - Co-workshop lead for U.S.-German virtual workshop series events on “Artificial Photosynthesis”: September 2021, May 2022.

- Co-Session lead for the 3rd Annual DOE HydroGEN Advanced Water Splitting Technology Pathways Benchmarking and Protocols Workshop. Co-wrote report submitted to DOE based on information collected in this session and follow-up survey. (Virtual, March 1st-3rd, 2021).
- Lead organizer or Co-organizer for tutorial session on electrochemistry at annual AIChE meeting. (annually between 2014-2019, 2021)
- Lead organizer for new symposium on “Light-Driven Chemistry” at ACS Spring meetings. 2017 symposium featured 6 sessions involving ~65 talks. (2017, 2019)
- Co-organizer and participant in 2-day Gerischer Conference and workshop on Photocatalysis. Boulder, Colorado. (August 2018)
- Co-organizer for Closing the Carbon Cycle Workshop at Columbia U., which included ~ 25 experts from university, industry, and national labs to discuss “Fuel Generation in Remote Locations”. Co-sponsored by the Lenfest Center, Arizona State University, Denmark Technical University (DTU). (October 2017)
- Co-lead organizer for NSF- and ARL-funded workshop on solar fuels production by photovoltaic-electrolysis, hosted by the University of Delaware. Organized sessions, invited speakers, lead break-out sessions. (March 2016)

DEPARTMENTAL AND UNIVERSITY SERVICE

- Departmental ABET representative. Attend monthly ABET meetings, collect course materials from colleagues, co-wrote ABET 2024 report, coordinate departmental small committee meetings. (2023-present)
- Departmental leadership committee. Attend monthly meetings with department chair, vice chair, and other committee chairs to coordinate efforts and discuss pressing matters related to departmental affairs. (2023-present)
- Undergraduate committee. Conducted biannual student advising (20-40 students/semester), curated advising forms, curated senior theses, conducted graduation clearances, organized and participated in various recruitment events, orientation, student lunches, graduation banquets, & resume workshops. (2014-2019 (member), 2023-present (Chair))
- ChemE car club advisor. Meet with and provide guidance to students related to ChemE car club activities. (2023-present)
- DUBY Award Committee Chair. Coordinate with other committee members to solicit nominations and select awardees for the Paul DUBY Award in Electrochemistry. (2022-present)
- Masters committee. Participated in academic advising, program planning meetings, and assisted with the recruiting and admissions process including co-organization of Open Houses. (2020-2022)
- Mentor for Egleston Scholars. Assist in recruiting perspective scholars and participated in “enhanced advising” sessions with current Egleston students assigned as mentees. (2019-present)
- Coordinated Chemical Engineering REU program. (Summer 2019)
- Represented ChemE department at the SEAS Open House for admitted high school seniors. (April 2019)
- Organizer for department seminar series and student colloquium (Spring 2015-2018)
- Served as internal reviewer for SEAS seed funding programs (RISE, SIRS) (8 times)
- Department liaison with the Societe de Chimie Industrielle (2016-2018)
- Scribe for departmental meetings. (Fall 2014-Fall 2016)
- Active participant in faculty candidate recruitment. (every year 2014-2019, 2022-2024)

- Served on Panel: “Preparing for the Academic Search Process Panel”. (2017, 2019, 2020)

OUTREACH, PUBLIC ENGAGEMENT, AND ENTREPRENEURIAL ACTIVITIES

▪ Interviews and press releases:

- Sept. 2023, “[Bringing Down Emissions in Three Carbon-intensive Sectors](#)”, interview with Grant Currin from Columbia Engineering News.
- February 2022, “[Columbia Receives \\$4.8 Million for ‘High Risk, High Reward’ Research](#)”, Strauss news / The Spirit, highlights new DOE project on water electrolysis.
- September 2020, “[Cleaning up the Construction Industry](#)”, highlight on joint research with the Kawashima Lab in the Columbia Engineering Magazine.
- February 2019, Solar Fuels Engineering Lab selected for “[Research Lab Highlight](#)” feature article in newsletter for the International Association of Hydrogen Energy.
- April 2018, “[Chemical Engineer Daniel Esposito Wins NSF CAREER Award](#)”, CU press release.
- Dec. 2017, press releases related to publication in the International J. of Hydrogen Energy: “[Columbia Engineers Develop Floating Solar Fuels Rig for Seawater Electrolysis](#)”, press release written by Holly Evarts in Columbia Engineering. Additional articles or press releases written by Newsweek, [Smithsonian.com](#), ScienceDaily, NBC News, IEEE Spectrum, Materials World..
- Aug. 2016, “[Turning Sunlight into Fuel](#)” interview with Earth Institute blogger.
- Spring 2016, “[From All Corners of Engineering, Sustainable Energy Solutions in the Works](#)”. Article in the Columbia Engineering Magazine,
- Oct. 2014, “[Converting Sunlight into Storable Solar Fuels](#)”, write-up by CU SEAS.

▪ Educational or public outreach seminars and panels:

- (Virtual) Guest lecture on solar fuels at Texas A&M University (October 2021).
- Panelist on virtual workshop event hosted by SEAS for summer undergraduate and MS students seeking research opportunities (February, 2021).
- Served on Panel: “Preparing for the Academic Search Process Panel” workshop for SEAS PhD and postdocs interested in pursuing academic careers (Oct. 2017 – Dec. 2020).
- Seminar on finding, reading, and evaluating academic research articles to ~ 12 Bridge-to-PhD Summer@SEAS undergraduate researchers. (Summer 2019, summer 2020, Fall 2020).
- Invited speaker at the Sustainable Westchester Hydrogen Mini-Conference, White Plains, NY, December 2019.
- Served on panel for Columbia Engineering Energy Club event on the future of energy, attended by 50+ students. (Oct. 2019)
- Seminar on Solar Fuels to the Columbia Global Center for Energy Policy (GCEP), September 2018.
- Served on AIChE /Chemist Club career panel event, April 2018.
- Public seminar (“Master Class”) on solar energy as a part of the SEAS Preview Day for prospective undergrad students and their families (~ 200 people), July 2018.
- Public seminar on solar fuels as a part of Columbia Family Weekend, October 2017.
- Seminar to high school students in Columbia’s “Upward Bound” summer program for 1st generation college students, July 2017.
- Evening seminar & panel discussion, Columbia Energy Club, April 2017.
- Lunch-time seminar to Columbia summer REU students, July 2016-2018.
- Evening seminar to the Columbia University Undergraduate Energy Club, Nov. 2015.

- **K-12 outreach:** Lead lab tours and demos in coordination with Columbia SEAS outreach office for various programs and local high schools (SEAS Inside Engineering (4-6 times), SEAS SHAPE program, ELLIS school, Mott Hall middle school, CU Society of Hispanic Professional Engineers, GOALS for Girls, and more). (2016-present)
- **High school research:** Mentored 8 URM and/or female high school researchers for summer research through the SEAS Engineering the Next Generation (E.N.G.) Program. All 8 are pursuing or planning to pursue college degrees.
- **Entrepreneurial activities:**
 - Co-founder and advisor of start-up company, sHYp BV PBC, which is developing electrolysis systems for maritime applications. Actively engaged with technology development, techno-economic analysis, pilot plant design, and fundraising. Raised over \$ 3 M to date. (2019-present)
 - Advisor of start-up company, Turnover Labs, which was founded by former student Dr. Marissa Beatty and is developing carbon dioxide electrolyzers for converting impure streams of carbon dioxide into chemicals. (2024-present)
 - Lead PI on a project funded through the NY State Powerbridge Accelerator Program, which sponsors university research projects aimed at translating clean technology into the market place. (2019-2020)
 - Delivered annual lecture on technoeconomic analysis as a part of elective course on solar fuels (CHEN E4330), as well as a colleague's class (EAEE E4305) on CO₂ utilization and conversion (2017-2020).
 - Served as a tutor and organizer as a part of a tutorial session on “setting up an electrochemistry start-up company” at the 2021 International Society of Electrochemistry meeting. (Virtual).
